

**RED SKYPHOS**

ANTIQUE (French painting 1929-1999)

**DESCRIPTION:** Open two-handle  
red-figure skyphos from the  
Apulian workshop of the  
"Red" group. The firing  
temperature is 1000-1050  
degrees. The oxygen  
content is 10%. It  
comes from a beautiful red  
white clay.

magnetite turn a metal black. White high

In very good condition despite some use

**ORIGIN:** Apulia, a region from which  
experienced Greek colonization under P

and

On the front of the skyphos is a richly  
that she is about to give to her hero and  
of a nude man in movement, wearing  
symbols of the death and rebirth of her  
and acanthus leaves, in line with Greek  
geometric forms.
